Florida Flame Azalea
(*Azalea austrina*)

GLEN SAINT MARY NURSERIES CO.

Glen Saint Mary, Florida

TRADE - MARK REGISTERED

A landscape view at Glen Saint Mary

FOREWORD

HALF a century has passed since the founding of the Glen Saint Mary Nurseries by George Lindley Taber. This anniversary year is one of great satisfaction to those of us who have watched the development of the Nurseries into a sound institution which has assumed a foremost rank in the progress of southern horticulture. The present difficult economic situation has failed to shake the foundations of this business so firmly laid a half century ago. Our practical and scientific horticultural undertakings are being carried forward to maintain the same high standard of quality for which our firm has been noteworthy in the past.

This Catalogue is a general Price-List of all the plants which we offer. We send out five other Catalogues, each covering a separate department of our nursery. If more information is desired than is given in this Price-List, we respectfully refer you to the Catalogue of the group of plants in which you are interested.

ROSES. A 12-page Catalogue, illustrated in color, offering specially selected varieties for southern planting, including the new and highly desirable varieties from Australia.

ORNAMENTALS. 36 pages, well illustrated, describing shade trees, shrubs, and flowering plants for southern gardens.

FRUITS AND NUTS. 24 pages illustrated in color and black and white, devoted to the

fruits and nuts most satisfactory for southern planting.

CITRUS FRUITS. 16 pages in black and white and color with detailed information and descriptions of this most important class of fruits for Florida.

AZALEAS AND CAMELLIAS. 12 pages devoted to numerous handsome varieties of these two great southern shrubs.

Please write for the Catalogue in which you are interested, to

Planting of Indian Azaleas

Indian Azaleas

(*Azalea indica*)

Evergreen shrubs with large, funnel-shaped flowers, sometimes 4 inches across. They vary greatly in habit. Some are twiggy, others openly branched and spready. When in bloom they make a gorgeous display, unrivaled in color by any other flowering shrub.

Lavender

Formosa. Midseason. Hardy; open growth; luxuriant foliage; large flowers; free bloomer.

Omurasaki. Midseason. Very hardy; open growth; good foliage; strong grower.

Phoenicea. Midseason. Hardy; compact grower; luxuriant foliage; large flowers; free flowering. Somewhat similar to Formosa.

Red and Deep Pink

Brilliant. Early. Hardy; bushy, compact grower; small leaves; free flowering.

Clear Dark Pink. Late. Hardy; bushy, compact grower; fine foliage; free flowering.

Præstantissima. Late. Semi-hardy; bushy, compact grower; good foliage; free flowering.

Pride of Dorking. Late. Hardy; open grower; free flowering.

Prince of Wales. Late. Hardy; bushy, compact grower; free flowering.

Light Pink

Crœmina. Midseason. Hardy; rather bushy; free flowering. Resembles Elegans.

Elegans. Early. Hardy; tall, open grower; good foliage; free flowering.

George Franc. Early. Hardy; full, bushy growth; free flowering; large flower.

Salmon

Duc de Rohan. Very early. Semi-hardy; bushy, compact growth; very free flowering; medium size.

Frederick the Great. Late. Hardy; bushy, low, compact grower; very free flowering.

Lawsal. Midseason. Hardy; rather bushy grower; free flowering.

Wm. Bull. Late. Hardy; open growth; free flowering; small, double flowers, like roses. Rather unique.

Variegated

Anthonon. Late. Hardy; full foliage; good grower; free flowering.

Cerces. Late. Hardy; bushy, compact grower; full foliage; free flowering.

Vervaine. Late. Hardy; tall, open grower; free blooming.

Vittata Fortunei. Early. Hardy; tall, open grower; free blooming; medium-size flowers. Earliest and longest blooming variety.

White

Fielder's White. Early. Hardy; strong, upright grower; best foliage of the whites. Large, pure white flowers; free blooming.

Flag of Truce. Midseason. Hardy; rather compact, bushy grower; free blooming. Double flowers, very desirable.

Latana Alba. Late. Hardy; rather dwarf, bushy growth; good-sized, pure white flowers.

Orange

Coccinea Major. Midseason. Hardy; upright grower; good foliage; free flowering; flowers medium size.

Glory of Sunninghill. Midseason. Hardy; bushy, compact grower; free flowering; medium size; rather pointed petals. Choice variety.

Prince of Orange. Midseason. Hardy; luxuriant foliage; compact grower; free flowering; good-sized flowers that are well mixed through the foliage.

President Clay. Midseason. Hardy; rather upright grower; free flowering; medium-size flowers. Needs half shade as flowers bleach in full sun.

PRICES OF INDIAN AZALEAS

	Each	Per 10		Each	Per 10
8 to 12-inch spread	\$1 00	\$9 00	2 to 3 feet high (lavenders only)	\$3 50	\$30 00
12 to 18-inch spread	1 50	12 50	3 to 4 feet high (lavenders only)	5 00	45 00
18 to 24-inch spread	2 50	20 00	4 to 5 feet high (lavenders only)	7 50	70 00

Native Azaleas

Azalea austrina, A. canescens, and A. serrulata. Small clumps, 2 to 3 feet, \$1.25; medium clumps, 3 to 4 feet, \$2.50; large clumps, 4 to 5 feet, \$5.00.

Glen Saint Mary Azalea Gardens, during their blooming season (February and March), present a truly wonderful sight. The public is cordially invited to visit them and enjoy their loveliness. Our SPECIAL Catalogue, AZALEAS and CAMELLIAS, contains valuable information on planting and care. Write for a copy.

Kurume Azaleas (*Azalea obtusa japonica*)

Charming plants of bushy habit, unsurpassed for bedding. Perfectly hardy and at blooming-time completely buried in a mass of flowers of the greatest delicacy and beauty.

Lavender

Fujimoyo. Delicate lavender, single flowers. Good foliage. Compact.

Lavender Queen. Light lavender. Free flowering. Luxuriant foliage.

White

Snow. Large, pure snow-white flowers, freely produced. Compact, dense foliage of glossy green color.

Red and Deep Pink

Hexe. Low, compact grower. Flowers large for Kurume type, single. Free blooming. One of the best.

Christmas Cheer. Compact; fine deep green foliage. Free blooming. Hose-in-hose flowers—a good Christmas red color.

Sunstar. Free flowering; medium size; blooms over long period.

Variegated

Apple Blossom. Name describes flowers. Foliage good. Desirable.

Peach Blow. Resembles peach blossoms; very dainty. Light green foliage.

Light Pink

Cherry Blossom. Dainty hose-in-hose flowers. Deep green foliage.

Coral Bells. Dainty hose-in-hose flowers. Very free flowering. Good foliage.

Daybreak. Very free flowering, in large clusters. Luxuriant foliage.

Salmon

Bridesmaid. Free flowering, in large clusters. Small, glossy green foliage.

Pink Pearl. Flowers hose-in-hose, in large clusters.

Salmon Beauty. Large hose-in-hose flowers. Free flowering.

Orange

Flame. Free flowering. Brilliant color. Showy, light green foliage.

Yaye giri. Free flowering; very showy; foliage good.

Kurume Azalea, Coral Bells

Double White Camellia

Camellias

Camellia japonica, known and loved throughout the South as "Japonica," came to us many years ago by way of England. The genus was named for a Jesuit missionary, George Joseph Kamel, who spent his life in China. Many years ago, Camellias were great favorites, but their popularity waned until they were rarely seen except in the oldest southern gardens. In the past few years they have returned to popular favor and now the demand for Camellias far exceeds the supply.

Chandleri Elegans. Flowers large, full, loose, variegated with white and rose. Good foliage. Vigorous grower. Very showy and one of the best.

Lady Campbell. A good red.

Dixie. Rose-pink.

Sarah Frost. An old standby. Flowers rose-color, very double. Late. Free flowering.

Wilder's Rose. Double; rose-pink. Free flowering.

Henry Favre. Flowers small, red; regular petals. Very free flowering. Bush dense.

Marie Louise. Variegated; double; very beautiful.

Americana. Blush-pink, striped deeper shade.

Duchesse d'Orleans. Very double; waxy white, sparingly striped with rose.

Mme. de Strekaloff. Variable; peony-flowered. Blush-pink with darker blotches and streaks. Very satisfactory.

Nobilissima. Full, double white, with stamens interspersed among petals. Early. Desirable.

Sacco. A double, light rose, free-flowering variety.

Candidissima. Double, pure white. Free flowering. Late. Foliage light green. One of the best whites.

Alba Plena. Pure white, double flowers with regular petals. Free flowering. Probably the best of the whites.

La Reine. Pink, edged white; double.

Speciosa. Double red, peony or pompon to peony type; large; partly imbricated.

By Colors Only

Dark Red. Flowers full, double; when old assume a bluish tinge. Free bloomer.

Vivid Pink. Flowers full; petals regular; some flowers star shaped. Free bloomer; vigorous grower.

Variegated, Double Pink and White, Double Red and White.

Seedling Camellias

Because Camellias do not reproduce themselves exactly from seed, it is impossible to tell what the flowers of seedlings will be like until they bloom. Many seedlings revert to single and half-double types, but there is always a certain percentage of high-class double flowers sometimes surpassing the parent forms. Buying them is a delightful game in which the purchaser has everything to gain and nothing to lose.

Palms and Cycads

Palms are among the most striking plants which may be used for outdoor southern planting. Their bare, single stems and huge, arching leaves distinguish them from all other plants. Wherever seen, well-grown specimens always attract attention and give a decidedly tropical touch to the grounds and to the landscape. As street and shade trees, they are excellent and worthy of extensive use. The varieties which we offer our customers will be found most satisfactory for outdoor planting. All are pot-grown, or shipped with balls of earth, and may therefore be transplanted at any season of the year.

Sabal Palmetto

A few well-chosen Evergreens substitute beauty of mass, texture, and color for the hard, ugly base and foundation lines of a building

Coniferous Evergreens

These plants make beautiful individual lawn specimens. The different colors—yellow, green, dark green, and blue-green—give a striking effect when planted in masses, either when groups are made up of a single kind or of a number of different kinds. They make an excellent background for other shrubs and are of great value in foundation plantings. For hedges they are unsurpassed. In planting for a hedge, they should be given more distance than other hedge plants—4 to 5 feet apart is not too much. As plants for porches or porch-steps, they are very satisfactory.

Shrubs and Hedge Plants

Shrubbery is most effective in bringing out certain features of the lawn and softening harsh lines, to screen some unsightly building or object, or to break the outline of foundation walls. The number of shrubs which may be planted will be governed by the shape and extent of the grounds, but even the smallest lot has a place for a few.

Rock-Garden Suggestions

The plants adapted for rock-gardens in the South are very different from those commonly used for that purpose in less temperate climates. Very little information is available in books concerning plants suitable for southern rock-gardens. The varieties offered here have been tested by our own experience and are offered as suggestions.

Cinderella Rose , 3-inch pot.....	Each \$0 50
Cotoneaster horizontalis , 3-inch pot.....	75
Cryptanthus , 2½-inch pot.....	35
Hemerocallis .

Bamboos

There are no more beautiful plants than the Bamboos. The long, willowy canes and fine foliage give a delicate, pleasing effect. Under suitable climatic conditions they will grow on very poor soil, if well supplied with plant-food. Good drainage they should have, and moisture in abundance.

Arundinaria japonica (*Bambusa metake*). Hardest Bamboo, quickly growing 15 feet high. Large, handsome foliage. Spreads rapidly.

Bambusa argentea. Vigorous grower for hedges and screens. Handsome foliage and canes which, if left unpruned, will grow 25 feet.

Bambusa argentea striata. A similar variety with green canes, striped with yellow near the base. The leaves are also variegated with whitish stripes.

Bambusa disticha. A very handsome clump Bamboo, with fern-like leaves rarely taller than 15 feet.

Bambusa verticillata. Upright clump Bamboo, with yellow and green striped canes about 30 feet high.

Phyllostachys aurea (*Bambusa aurea*). Rapidly spreading, very hardy Bamboo, with bright yellow canes. Very graceful and hardy.

Prices of Bamboos

Grasses and Ground-Covers

The most important grasses suitable for southern lawns are offered here. Best lawns are grown from cuttings planted in spring and summer.

Pampas Grass

- Bermuda Grass** (*Cynodon Dactylon*). A favorite for lawn purposes in the Lower South. Cuttings, \$2 per bus.
- Carpet Grass** (*Axonopus compressus*). A valuable lawn grass coming into general use. It resembles St. Augustine Grass and retains its color well in cool weather. Cuttings, \$2 per bus.
- St. Augustine Grass** (*Stenotaphrum secundatum*). A broad-leaved grass excellent for shady locations. May be grown close to salt-water. Spreads rapidly. Cuttings, \$2 per bus.
- Centipede Grass** (*Eremocbloa ophiuroides*). A fine lawn and pasture grass, thoroughly tested at the Florida Experiment Station. Roots deeply and withstands drought. Cuttings, \$2.50 per bus.; \$2 per bus. in 5-bus. lots.
- Pampas Grass** (*Cortaderia argentea*). Fine, handsome clumps 6 to 8 feet high. Very ornamental for screens and individual specimens. Small clumps, \$1 each, \$9 for 10; strong clumps, \$1.50 each, \$12.50 for 10; extra-strong clumps, \$2.50 and up.
- English Ivy** (*Hedera helix*). A lovely evergreen vine which will creep, crawl, or climb. Dark, waxy green foliage. 35 cts. each, \$3 for 10.
- Liriope**. Dark green, grass-like foliage 6 to 8 inches long. Spikes of lavender flowers like grape hyacinths. 25 cts. each, \$2 for 10.
- Ophiopogon japonicus**. A grass-like plant about 6 inches high which spreads rapidly by underground stems. Small clumps, 50 cts. for 10; medium clumps, \$1.50 for 10; large clumps, 25 cts. each, \$2 for 10.
- Weeping Lantana** (*Lantana delicatissima*). An excellent ground-cover, with handsome foliage and beautiful lilac-colored flowers. Pot-grown plants, 35 cts. each, \$3 for 10.

Vines

Vines add a great deal to the beauty of the home and its surroundings. The South is fortunate in the number of beautiful flowering vines which will grow to perfection in a very short time. Where it is desired to cover up the appearance of newness on a building they are unequalled. Descriptions of the following vines will be found in our Catalogue on Ornamentals for Southern Planting.

Allamanda Hendersoni	Honeysuckle, Trumpet
Antigonon leptopus	White, Variegated
Bignonia Chamberlayni	Jasminum pubescens simplicifolium
radicans	Pandorea jasminoides
speciosa	Rhyncospermum jasminoides
venusta	Thunbergia grandiflora
Bougainvillea glabra	Wisteria, Purple
Sanderiana, Crimson	White
Lake	Yellow Jessamine
English Ivy	
Ficus repens

Fruits and Nuts

Complete descriptions of all varieties of fruits and nuts which we offer will be found in our special catalogue devoted to that branch of our business. Much attention has been devoted to the development of Citrus Fruits by this nursery, and special attention is paid to the understock upon which different varieties are budded. In recent years pecans have become very important and have developed into a fine profit-making crop for the South. Other tropical and exotic fruits hardy in northern and central Florida have been tested and distributed through our efforts. For complete information see our catalogue on Fruits and Nuts.

Hamlin Orange

Etoile de Hollande

Roses

We publish a special booklet on Roses, to which we refer those interested in complete descriptions. Our plants are grown in the open field, budded on strong understocks.

For especially difficult soil, the following varieties are available on Cherokee rootstock: Talisman, Radiance, Red Radiance, Luxembourg, Mrs. Charles Bell, Maman Cochet. Roses are priced slightly higher but are worth it where the soil is very bad.

The best Roses for southern conditions belong to the Tea and Hybrid Tea groups, and the new Hybrid Giganteas and Climbing Hybrid Teas are especially promising for southern gardens.

GLEN SAINT MARY NURSERIES COMPANY
Citrus Nurseries: WINTER HAVEN, FLA.

 See Reverse Side for Temple Orange Agreement *Signature of Customer* _____

SPECIAL ORDER SPACE FOR TEMPLE ORANGE TREES

To protect myself and other purchasers of Temple Orange Trees against the competition of inferior fruit sold under the same name, and to protect you in the right to exclusively propagate and distribute this orange, and in consideration of the fact that you are to supply me the trees ordered above, I agree not to sell or give away, or to permit anyone else to take any scions, buds, or cuttings from these trees, or from their progeny, for a period of twenty-five years.

I further agree not to sell or give any of these trees away, and in case of disposition of property on which the trees are planted, I obligate myself to make this agreement a condition of the transfer.

Explanation of the Order Sheet and Protection Agreement Printed Above

You will note in the order blank herewith a clause binding you not to dispose of any budwood of the trees of the Temple orange or of the trees themselves.

This agreement is both for your protection and for ours. We regard it of just as much importance, if not more, from your standpoint as from ours, and believe you will agree with us.

If the propagation and distribution of trees of this orange are not confined to a single responsible, dependable channel, all sorts and kinds of so-called Temple oranges will be offered within a few seasons.

The fruit of some of these strains, if indeed not all of it, except the original from our nurseries, will be inferior, and when this poorer fruit is marketed under the Temple name it will have a tendency to lower the prices offered for true Temple oranges.

By the restrictions we are placing on the sale of Temple budwood and trees, we are endeavoring, just as far as possible, to protect our customers against this condition. You know that the fruit of the true Parson Brown or Pineapple orange, for instance, does not sell as well as it would if there were none of the false strains in the market.

This Agreement providing against the sale of budwood also is for our protection against unfair competition. We have thoroughly tested out this fruit and are propagating trees under conditions which assure you that they are healthy, true to name and first class in every way. It is but common fairness and simple justice that all selling rights in the Temple orange should be our property.

Respectfully submitted,

GLEN SAINT MARY NURSERIES COMPANY

New and Rare Australian Varieties for Rose Connoisseurs

We were the first in the South to offer this group of unusually fine Climbing Roses brought from Australia. They are entirely different from the old-time Climbing Roses, with larger flowers, clear handsome color, and with more graceful forms than any varieties heretofore introduced. They are becoming rapidly popular and in great demand. Be the first to grow them in your town.

Countess of Stradbroke. CL.HT. Magnificent deep velvety crimson-red.

Daydream. CL.HT. Blush-pink, frilled petals.

Flying Colours. H.Gig. Brilliant red blooms of startling brilliancy.

Harbinger. H.Gig. Clear, soft pink. Beautiful effect.

Kitty Kininmonth. H.Gig. Huge light red or dark pink; fadeless.

Lorraine Lee. H.Gig. A shrubby plant with orange-pink flowers.

Milkmaid. H.Nois. Small, creamy white flowers tinted fawn.

Mrs. Philip Russell. HT. Particularly effective fiery red flowers.

Nora Cunningham. CL.HT. Semi-double blooms of bright flesh-pink.

Queen of Hearts. H.Gig. Popular bright red variety.

Salmon Spray. Poly. Huge clusters of large salmon-pink flowers.

Scorcher. CL.HT. Stunning flowers of gorgeous scarlet.

Sunday Best. CL.HT. Huge, saucer-shaped, red flowers, white centers.

Sunny South. HT. Immense bush with gay pink and yellow blooms.

Above varieties, \$1.25 each, any number

The American Rose Society

A ROSE FOR EVERY HOME; A BUSH FOR EVERY GARDEN

The American Rose Society is an organization composed of amateur rose-lovers. They are banded together in support of the rose as their favorite flower. No requirement for membership is made except a love of roses, and all the effort of the Society is devoted to increasing mutual knowledge and appreciation of the flower.

On joining, each member receives from the Society an easy textbook on rose-growing called "What Every Rose-Grower Should Know." Four times a year the American Rose Quarterly, containing rose news and information, goes to each member. At the beginning of each year the American Rose Annual, a cloth-bound book of over 200 pages, is issued to each member. It is generally considered the best book in the world about roses. Each year it is different.

Dues are \$3.50 per year, 3 years for \$10. Send application for membership to us or to Secretary of the American Rose Society, Harrisburg, Pa.

GLEN SAINT MARY CATALOGUES

Roses. Ornamentals. Azaleas and Camellias. Fruits and Nuts. *Citrus Fruits

Any or all of these will be mailed free of charge upon request

*Please write our Winter Haven Office

Terms of Business

Location. General Office and Nurseries at Glen Saint Mary, Baker County, Florida, on Seaboard Airline Railway, and State Road No. 1, 30 miles west of Jacksonville. Office and Citrus Nurseries at Winter Haven, Polk County, Florida. Visitors are always welcome.

Applying Prices. Orders for five (5), fifty (50), and five hundred (500) plants command the 10, 100, and 1000 rates respectively, regardless of assortment.

Cash or satisfactory reference must accompany all orders for immediate shipment unless the party ordering has an account. On orders booked in advance of the shipping season, 25 per cent down, with the balance due when the shipping season opens, will be required.

Be sure to state clearly when ordering how you wish shipment made—Parcel Post, Express, or Freight. Lacking this information, we will use our best judgment as to method of forwarding. On orders for shipment by Parcel Post, add 25 per cent to the list price to cover cost of packing and postage. Please use our order blanks; additional ones will be mailed upon request.

Shipping and Planting Season. From the middle of November to March for bare rooted plants.

Substitution. It is our desire to furnish stock exactly as ordered. On orders for commercial planting, substitution of varieties will not be made without permission from customer. On small orders, items which we are unable to supply will be omitted unless we are instructed to substitute.

We guarantee all stock sent out to be well rooted, well grown, true to name, properly packed, and shipped according to instructions. Our liability under the foregoing guaranty is limited in amount to the original price received.

Claims. If, by any possibility, errors should occur, they will be promptly rectified, if claim is made within 10 days after the receipt of goods. Our responsibility ceases upon delivery of nursery stock in good condition to public carrier.
